

I am writing to entreat you not to replace the radio programming I have become so accustomed to with a LPFM. I have relied on the programming from AIR-1, 90.1, as a safe alternative for my childrens listening for some time now. I would be remissed to find a suitable, family friendly station if my current choice was displaced by some LPFM that would not serve this need, and there are no other viable alternatives in this area. We deserve the right to have a suitable choice of programming that is not going to fill our childrens heads with alot of unnecessary vulgarity or sexual innuendo. I am limited as to the receivable radio stations in my market area and would be very hurt if I was to lose the one choice of programming that I could feel good about, Air-1. Thank you for your consideration of this request.
